## PROVENANCE

**Origin:** Arnaud Quercy, Paris, France, 2020

## DESCRIPTION

This contemporary digital work captures the architectural character of Parisian rooftops through a contemporary visual approach. Part of the City of Lights, Shadows of Thoughts collection, the piece explores urban landscape through digital media, creating a miniature-scale composition that distills the essence of the French capital's distinctive skyline.

Light gray tones appear most prominently throughout the composition, balanced by deep black areas that create strong contrast and define structural elements. Warm orange and silver tones occupy substantial areas, establishing the characteristic color palette of Parisian architecture with its zinc roofing and limestone facades. Deeper russet and ochre passages provide accent notes, while subtle dusty mauve touches add unexpected color variety to the predominantly neutral scheme.

The digital medium allows for precise control of tonal relationships and spatial organization. The composition demonstrates high color clustering and smooth transitions between adjacent areas, creating coherent visual flow while maintaining clear definition of architectural forms. The work's miniature format requires close viewing to appreciate the careful balance between warm and cool tones that captures the particular light quality of Paris.

This piece carries certificate of authenticity number 20201231-0005, documenting its place within Quercy's 2020 production and the broader City of Lights, Shadows of Thoughts series.
